Please Note:

All project submittals and plan checks received by the District will require a 15 business day review period per submission. As part of the plan check process, additional studies, analysis or information may be required at the expense of the applicant.

Any work completed as part of these water improvement plans must be done by one of the District's pre-approved contractors. A (2) two-year warranty will be required from the Contactor after completion of these water facilities.

For complete instructions on the District's design criteria, please see Section 1.1 of the District's Standards for Domestic Water Facilities.
